

Help shape Staffordshire's nature recovery plans

Residents, communities, farmers, landowners, and businesses across Staffordshire and Stoke-on-Trent are being invited to have their say on plans to restore and protect the area's natural environment.

With its partner authorities, Staffordshire County Council has launched a public consultation on the Local Nature Recovery Strategy (LNRS), a long-term plan to support nature's recovery and create a greener, healthier future for the county.

The strategy sets out priorities, outcomes, actions, and targets for improving habitats, protecting wildlife and enhancing natural spaces for nature and people. It has been developed in partnership and consultation with councils, environmental organisations, farmers, landowners and other key stakeholders from across the area.

People are encouraged to first explore the draft strategy and interactive maps to understand the proposals in more detail.

Feedback can then be shared through a short online survey, helping to ensure the final strategy reflects the views of people and organisations across Staffordshire and Stoke-on-Trent. Detailed comments can also be made through the interactive maps.

People can explore the strategy and share their views by visiting: staffsandstokelnrs.co.uk.
The public consultation is open until 5.00pm on Monday 27th July 2026.
